**2007 CHART**

State	Requires CE to renew RN license	Number of CE hours to renew RN license	Number of CE hours required for re-entry	CE hours required for HIV/ AIDS
			inactive 3 yrs	
West Virginia	Yes	30 hrs every 2 yrs reporting period on the odd year; 2 of 30 hrs must be in "end of life care including pain management"	12 hrs/1yr	No
Wisconsin	No	None	After 5 yrs, refresher course required	No
Wyoming	Yes	20 hrs every 2 yrs	Refresher course may be required	No

End Notes

1. In Alabama, if an individual is licensed by endorsement or has requested reinstatement or reactivation, contact hours are prorated after initial requirements for reentry are met. Specialty practitioners include: Certified Registered Nurse Practitioners (CRNP), Certified Nurse Midwives (CNM) and Certified Registered Nurse Anesthetists (CRNA). To be approved to practice as a specialty practitioner, all continuing education requirements for certification must be met. Also, continuing education requirements must be met for licensure. The specialty practitioner may apply continuing education contact hours earned for certification toward license renewal provided the contact hours are earned in the earning period defined in the regulations. (Also see accompanying booklet titled "C.E. Questions and Answers for Licensees and Providers of Continuing Education").
2. In California, the California Business and Prof. Code @32 (1996) established the legislative requirements for an omnibus board to determine appropriate continuing education on AIDs related to assessment and treatment for licensed health care professions. Subsequently, the board has delegated this responsibility to the respective health care boards.
3. In Florida, one contact hour for each 24 month renewal cycle: 2 hrs of which must include prevention of medical errors; 2 hrs of domestic violence is required every third renewal. 1 college credit is equivalent to 10 contact hours.
4. Three hours of continuing education on domestic violence is a one time requirement in Kentucky.
5. The AIDS continuing education is mandated under KRS 214.615 and is required for all health professionals. Must be approved course by Kentucky Cabinet for Health Services.

**AMERICAN NURSES ASSOCIATION©**  
**STATES WHICH REQUIRE CONTINUING EDUCATION FOR RN LICENSURE**  
**2007 CHART**

6. The Michigan hours for AIDs continuing education come under the heading of infection control.
7. Mississippi requires continued education if the nurse has not practiced within the past 5 years.
8. If unlicensed anywhere for 3 yrs, must retest in Montana.
9. Preceptorship includes 75 hours of didactic and 75 hours of clinical course work. New Mexico does not require CE for endorsees.
10. In Washington to receive initial license there must be documentation of a minimum of 7 hours of HIV/AIDS education to include etiology, epidemiology; testing and treatment; legal and ethical issues to include confidentiality; and psychosocial issues to include special population considerations.
11. In Iowa, it is also mandated that a person who regularly examines, attends, counsels or treats dependent adults or children in Iowa, must accurately document compliance with mandatory training requirements on abuse identification and reporting. The course must have been completed within the last 5 years, and be a course that is approved by the Iowa Department of Public Health Abuse Education Review Panel. The training must also be two hours in length. A list of approved courses is available at [www.idph.state.ia.us/bh/abuse\\_ed\\_review.asp](http://www.idph.state.ia.us/bh/abuse_ed_review.asp).

Please note, this document is intended to inform readers of those states in which mandatory continuing education (ce) exists for RNs and if HIV/AIDS education is included. For complete information pertaining to ce requirements, visit the specific State Board for Nursing website. A general listing of the Board websites may be found at <https://www.ncsbn.org/boards.htm>
