

# Nurse Staffing Think Tank: Priority Topics and Recommendations

## Foreword

The nurse staffing crisis has no simple fix. Research shows that optimized nurse staffing is integral to high-level patient care, better patient/family experiences and nurse well-being. Adequate investment in appropriate nurse staffing is also essential to a health care institution's performance, reputation and financial viability. However, prevailing approaches to deploying nursing resources are not fully realizing the benefits of appropriate staffing. This is an urgent, high-stakes

patient safety issue that represents a health care system imperative—not simply a nursing one—that must be tackled in new and bold ways. Nurse staffing is a complex process that is affected by the health of the work environment and changes in the workforce, including nursing shortages, turnover and nurse competencies. Additionally, the economic pressures on the health care system pose challenges to appropriate staffing.

## Preface

In light of these challenges and opportunities, a group of organizations came together in 2018 to form the Partners for Nurse Staffing in a collaborative effort to explore new solutions for nurse staffing issues. This group includes representatives from the following organizations:

- American Association of Critical-Care Nurses (AACN)
- American Nurses Association (ANA)
- American Organization for Nursing Leadership (AONL)
- Healthcare Financial Management Association (HFMA)
- Institute for Healthcare Improvement (IHI)

The Partners for Nurse Staffing is focusing on ideas that maximize the investment in nurse staffing while creating the greatest value for patients, families, interprofessional health care teams, hospitals and payers. The objectives of the coalition are:

- Elevate awareness of the evidence-based link between appropriate nurse staffing and optimal patient care, as well as links to better patient experience, a thriving nurse workforce and optimizing the value of care.
- Identify and promote examples of staffing successes.
- Incubate bold innovations and transformative approaches.

#### **Preface** (continued)

The **National Nurse Staffing Task Force** (launching in Spring 2022) and **Think Tank** aim to provide a forum for powerful dialogue that will develop recommendations on a national scale to address critical challenges related to the nurse staffing crisis that have plagued the profession for decades. The **Task Force**, consisting of stakeholders, subject

matter experts (internal and external to nursing), and patient and family advocates, will focus on the acute and critical care setting during the initial phase of the work. The **Task Force** will work over a nine-month period to develop innovative strategies that will address longer-term, complex and persistent systemic issues in nurse staffing.

# **Executive Summary**

On January 11, 2022, the Partners for Nurse Staffing, a collaboration of five professional organizations, launched the Nurse Staffing Think Tank. Charged with identifying recommendations to address the nurse staffing crisis within a 12-18 month implementation timeframe, the group met every other week for a total of six meetings. The first meetings focused on identifying high-priority areas. Subsequent work conducted in small groups identified recommendations within each high-priority area, as well as action items and measurable

outcomes. The target audience for this work includes nurses, health care leaders and policymakers. The result of this work provides an action plan for the necessary cultural shift in health care delivery that can drive improved nurse retention, healthier work environments and better patient outcomes. The recommendations described here are actionable for health system and hospital leaders. Actions under the category, "Healthy Work Environment," also pertain to regulatory bodies, policymakers and specialty nursing organizations.

#### Think Tank Purpose

The American Association of Critical-Care Nurses (AACN), American Nurses Association (ANA), American Organization for Nursing Leadership (AONL), Healthcare Financial Management Association (HFMA) and the Institute for Healthcare Improvement (IHI) launched a nurse staffing think tank to find solutions to the nurse staffing crisis. The Think Tank brings together nurses, leaders and other stakeholders. As a collective, the Think Tank worked over three months to develop actionable strategies set to implement within 12-18 months with measurable outcomes that will address the nurse staffing crisis. This work sets the foundational work for a Nurse Staffing Task Force scheduled to launch in Spring 2022 by providing:

- Strategic advice on broad ideas and direction based on data that identifies the root causes of the nursing shortage
- Input on workforce trends, challenges and issues hindering progress toward feasible and practical staffing solutions
- Strategic direction for broader goals
- Options for action, including associated outcomes

#### **Executive Summary** (continued)

# Think Tank Participants and Representatives from Organizational Partners for Nurse Staffing

#### Think Tank Participants

- Janet Ahlstrom, University of Kansas Medical Center
- Carol Boston-Fleischhauer, The Advisory Board
- Danielle Bowie, Bon Secours Mercy Health
- Natalia Cineas, NYC Health + Hospitals
- Pamela Cipriano, University of Virginia, International Council of Nurses
- Amber Clayton, Society for Human Resource Management
- Vanessa Dawkins, NewYork-Presbyterian/Weill Cornell Medical Center and NewYork-Presbyterian Westchester Behavioral Health Center
- Vicki Good, Mercy Health
- Melinda Hancock, Sentara Healthcare
- April Hansen, Aya Healthcare Group
- Helen Haskell, Mothers Against Medical Error
- Kiersten Henry, MedStar Montgomery Medical Center
- Peggy Lee, VA of Southern Nevada and Nevada Action Coalition
- Ryan Miller, ChristianaCare Health System
- Sherry Perkins, Luminis Health Anne Arundel Medical Center
- Larry Punteney, Avantas
- Rosanne Raso, NewYork-Presbyterian Weill Cornell Medical Center
- David Tam, Beebe Healthcare
- Sarah Wells, Acute care nurse and Founder, New Thing Nurse

Special Contributor for Diversity, Equity and Inclusion, and Inclusive Excellence: Rumay Alexander

#### Representatives from Organizational Partners for Nurse Staffing

- Connie Barden, AACN
- Robyn Begley, AONL
- Katie Boston-Leary, ANA
- Linda Cassidy, AACN
- Wendy Cross, AACN
- Sarah Delgado, AACN
- Patricia McGaffigan, IHI
- Kendra McMillan, ANA
- Todd Nelson, HFMA
- Cheryl Peterson, ANA

The Partners for Nurse Staffing wish to thank Regina Black-Lennox, the Satell Institute, for serving as the group facilitator, and Karen Thomas and Melissa Jones for their editorial expertise.

## **Executive Summary** (continued)

Overview of Priority Topics and Recommendations	Healthy Work Environment	<ul> <li>Elevate clinician psychological and physical safety to equal importance with patient safety through federal regulation.</li> <li>Specialty nursing organizations should investigate evidence related to scope of practice and minimum safe staffing levels for patients in their specialty.</li> </ul>
	Diversity, Equity and Inclusion (DEI)	<ul> <li>Implement Inclusive Excellence, a change-focused iterative planning process whereby there is deliberate integration of DEI ideals into leadership practices, daily operations, strategic planning, decision-making, resource allocation and priorities.</li> </ul>
	Work Schedule Flexibility	Build a flexible workforce with flexible scheduling, flexible shifts and flexible roles.
	Stress Injury Continuum	<ul> <li>Address burnout, moral distress, and compassion fatigue as barriers to nurse retention.</li> <li>Incorporate well-being of nurses as an organizational value.</li> </ul>
	Innovative Care Delivery Models	<ul> <li>Implement tribrid care delivery models that offer a holistic approach with three components, including onsite care delivery, IT integration of patient monitoring equipment, and ambulatory access and virtual/remote care delivery. This approach will improve access, patient and staff experience, and resource management, with continuous measurement for improvement and adjustment for sustainability and support.</li> </ul>
	Total Compensation	<ul> <li>Develop an organization-wide formalized and customizable total compensation program for nurses that is stratified based on market intelligence, generational needs and an innovative and transparent pay philosophy that is inclusive of benefits such as paid time off for self-care and wellness and wealth planning for all generations.</li> </ul>

# Healthy Work Environment

**Operational definition:** A healthy work environment is safe, healing, humane, and respectful of the rights, responsibilities, needs and contributions of all people including patients, their families, nurses and other health care professionals. In these environments, nurses and other team members can provide their optimal contribution and derive fulfillment from their work and patients can achieve the best possible outcomes.

#### Recommended action for policymakers and health system leaders:

Elevate clinician psychological and physical safety to equal importance with patient safety through federal regulation.

	Workplace violence: Address physical safety	Work environment: Ensure psychological safety
Definition	Nurses' hazards include:  Lifting and moving patients  Handling sharps; chemical, radiation or infectious exposures  Chronic stress from high-stakes work  Workplace violence	<ul> <li>Psychological safety may be defined as the ability to be oneself without fear of negative consequences.</li> <li>In a psychologically safe environment, teams feel that interpersonal risk-taking is safe.</li> <li>Incivility, bullying and lateral violence are not tolerated.</li> </ul>
Targets	Clinician physical safety in work environment	<ul><li>Health care teams</li><li>Health care leaders</li></ul>
Scope of impact	Every U.S. acute, critical access and long-term care hospital	National impact via federal regulation; institutional impact if adopted by leaders
Accountable entities	<ul> <li>Health care leaders and health systems</li> <li>Professional nursing organizations to advocate for policy/regulatory change</li> <li>Federal and state policymakers and regulators to codify workplace violence tracking and prevention</li> </ul>	<ul> <li>Centers for Medicare &amp; Medicaid Services (CMS)</li> <li>Health systems</li> <li>Federal government</li> <li>Professional nursing organizations for advocacy</li> <li>Health care leaders for institutional implementation</li> </ul>
Timeline	Within 12 months	Within 12-18 months

 $continues \rightarrow$ 

## **Healthy Work Environment** (continued)

	Workplace violence: Address physical safety	Work environment: Ensure psychological safety
Measurable outcomes	<ul> <li>Decrease in rates of physical violence against health care professionals in the organization</li> <li>Implementation of federal legislation and/or CMS regulation that requires health care facilities to track workplace violence and to put in place measures to ensure the physical safety of their employees (regular and contracted)</li> <li>Decrease in Workers' Compensation claims for violence</li> </ul>	<ul> <li>Implement a process for routinely measuring the health of the work environment.</li> <li>Implement a quality control process for acting on data about the work environment to move toward improvement.</li> <li>Implement a CMS Condition of Participation that addresses the health of the work environment.</li> <li>Collect unit-level data on the safety of the work environment routinely on a quarterly basis and use the data to drive needed change.</li> <li>Collect, stratify and report data on workplace safety and harms (physical and nonphysical) to assess equity in the work environment.</li> </ul>
Action steps/ Steps toward implementation	<ul> <li>Implement processes to track and prevent workplace violence within health systems.</li> <li>Enact federal legislation and CMS regulations to protect and give employees a bold voice against physical violence in the workplace (with exemptions to be specified for patients with illness-related delirium and other organic processes).</li> <li>Advocate for implementation of federal legislation to protect health care professionals.</li> <li>Advocate for implementation of a standard or Condition of Participation by CMS requiring that hospitals protect health care professionals.</li> <li>Consider using the Quadruple Aim as a framework for equating patient and professional safety.</li> </ul>	<ul> <li>Develop and enforce anti-violence principles, policies and processes for employee protection on an organizational level.</li> <li>Discuss with CMS Deputy Administrator.</li> <li>Advocate for clinician experience as a criterion in the CMS Hospital Value-Based Purchasing program (mirroring patient experience).</li> <li>Advocate to create a CMS Condition of Participation that requires organizations to regularly assess/measure the health of the work environment and demonstrate evidence of continual improvement.</li> </ul>
Supporting evidence	<ul> <li>Dyer O. <u>U.S. hospitals tighten security as violence against staff surges during pandemic BMJ</u> 2021; 375:n2442</li> <li>OSHA. <u>2016 report on healthcare workplace violence</u>.</li> <li>U.S. Bureau of Labor Statistics. <u>Fact Sheet on Workplace Violence in Healthcare</u>.</li> </ul>	<ul> <li>Aiken, L. H., Cimiotti, J. P., Sloane, D. M., Smith, H. L., Flynn, L., &amp; Neff, D. F. (2012). #### **Healthy Work Environment** (continued)

## **Recommended action for specialty nursing organizations:**

Investigate evidence related to scope of practice and minimum safe staffing levels for patients in their specialty.

Торіс	Investigation of minimum safe staffing levels for specific patient populations
	<ul> <li>Development of staffing standards to address the needs of patients in specialty populations</li> </ul>
Definition	<ul> <li>Similar to the role professional organizations take in defining "scope and standards of practice" for nurses, there is a role to define appropriate staffing.</li> <li>Staffing standards are defined according to patient needs and existing evidence that correlates staffing levels and patient outcomes. The standards include consideration for the range of patient acuity and skill mix available in different organizations.</li> </ul>
Targets	Specialty nursing organizations, direct care nurses and nursing leaders
Scope of impact	National impact
Accountable entities	Specialty nursing organizations
Timeline	<ul> <li>Six months for investigation of minimum staffing levels</li> <li>Twelve months for development of staffing standards</li> </ul>
Measurable outcomes	<ul> <li>Specialty organizations:</li> <li>— Assess applicability and report that they have undertaken this work within six months</li> <li>— Define staffing standards for patients in their specialty</li> </ul>
Action steps/ Steps toward implementation	<ul> <li>Nursing specialty organizations investigate evidence related to scope of practice and minimum safe staffing levels for the specialty.</li> <li>Organizations play a role in creating standards that delineate staffing requirements for optimal care.</li> <li>Organizations apply a process that engages key stakeholders, including direct care nurses, in the development of staffing standards.</li> <li>Consider using the work of other specialty organizations, such as AWHONN, that have created staffing standards as exemplars.</li> </ul>
Supporting evidence	<ul> <li>Aiken, L. H., Cerón, C., Simonetti, M., Lake, E. T., Galiano, A., Garbarini, A., Soto, P., Bravo, D., &amp; Smith, H. L. (2018). # Diversity, Equity and Inclusion

*Operational definition:* Nurse leaders have a responsibility to address structural racism, cultural racism and discrimination based on identity (e.g., sexual orientation, gender), place (e.g., rural, urban), and circumstances (e.g., disability, mental health condition) within the nursing profession and to help build structures and systems at the societal level that address these issues to promote health equity. This definition of Inclusive Excellence describes a change-focused iterative planning process whereby there is deliberate integration of diversity, equity and inclusion (DEI) ideals into leadership practices, daily operations, strategic planning, decision-making, resource allocation and priorities. It also states that the work is about change and therefore requires constant, innovative ways to have a diverse workforce. This definition shuts down the typical comments of lowering quality in order to achieve diversity (Williams, Berger, McClendon, 2005).

Building a diverse nursing workforce is a critical part of preparing nurses to address social determinants of health (SDOH) and health equity. While the nursing workforce has steadily grown more diverse, nursing schools need to continue and expand their efforts to recruit and support diverse students that reflect the populations they will serve. Diversity and inclusion is evidentially linked to psychological safety, which in turn has an impact on retention.

**Recommended action for leaders of health systems and hospitals:** Implement Inclusive Excellence, a change-focused iterative planning process whereby there is deliberate integration of diversity, equity and inclusion ideals into leadership practices, daily operations, strategic planning, decision-making, resource allocation and priorities. Diverse includes diversity in sexual orientation, gender, race, ethnicity, and physical and psychological ability.

	Increase diversity in nursing leadership	Build a diverse nursing workforce	Provide psychological safety to attract/retain a diverse workforce	Establish a nursing diversity dashboard
Definition	Inclusive Excellence is a change- focused iterative planning process whereby there is deliberate integration of diversity, equity and inclusion ideals into leadership practices, daily operations, strategic planning, decision-making, resource allocation and priorities.	Diverse workforce is a critical part of preparing nurses to address SDOH and health equity.	Psychological safety is linked to diversity, equity and inclusion. Four stages include inclusion safety, learner safety, contributor safety and challenger safety.	A nursing diversity dashboard tracks workforce demographics and measures alignment with the community, state and nation.

 $continues \rightarrow$ 

## **Diversity, Equity and Inclusion** (continued)

	Increase diversity in nursing leadership	Build a diverse nursing workforce	Provide psychological safety to attract/retain a diverse workforce	Establish a nursing diversity dashboard
Targets	Nurse leaders	Direct care nursing staff	Health care workforce	<ul><li>Nursing</li><li>Nursing leadership</li><li>C-suite</li></ul>
Scope of impact	<ul><li> Managers</li><li> Directors</li><li> Administrators</li><li> C-suite</li></ul>	<ul><li>Patients</li><li>Nurses</li><li>Schools of nursing</li><li>Faculty</li></ul>	Health care teams	Health care teams
Accountable entities	<ul><li>Nursing leadership</li><li>C-suite</li></ul>	<ul><li>Nursing leadership</li><li>C-suite</li></ul>	<ul><li>Nursing leadership</li><li>C-suite</li></ul>	<ul><li>Nursing leadership</li><li>C-suite</li></ul>
Timeline	12 months	12 months	12 months	6 months
Measurable outcomes	<ul> <li>Data dashboard of nursing leaders will show improvement in diversity within one year.</li> <li>Dashboard should align with the diversity in the population served by the facility.</li> </ul>	<ul> <li>Data dashboard of nursing workforce will show improvement in diversity within one year.</li> <li>Dashboard should align with the diversity in the population served by the facility.</li> </ul>	Data measuring psychological safety will show improvement within one year.	Data dashboard will be available within six months.

continues ightarrow

**Diversity, Equity and Inclusion** (continued)

	Increase diversity in nursing leadership	Build a diverse nursing workforce	Provide psychological safety to attract/retain a diverse workforce	Establish a nursing diversity dashboard
Action steps/ Steps toward implementation	<ul> <li>Review the leadership team.         Direct all current and upcoming vacancies to be diverse hires (in accordance with labor laws and human resources (HR) guidelines). Note that "diverse hires" should be defined beyond race/ethnicity.</li> <li>Monitor the speed and trends at which underrepresented groups are hired and move up the corporate ladder.</li> <li>Review turnover data for staff who are Black, Indigenous and People of Color (BIPOC) and other underrepresented groups.</li> <li>Define diversity broadly. Specific groups mentioned in the Think Tank, in addition to BIPOC, include gender (which, like race, is specifically not diverse in nursing) LGBTQ, differently abled professionals and those with substance use disorders.</li> </ul>	<ul> <li>Nursing schools recruit and support diverse students that reflect the populations they will serve.         Include the following in defining diversity: Gender, LGBTQ, BIPOC, ethnicity, ableism, psychiatric/mental health/substance use.</li> <li>Embrace LPNs and ADNs as a strategy to diversify workforce. They must be treated and respected similar to RNs. Support and respect their desire to pursue advanced degrees.</li> <li>Institute diversity awards and publicize demographics of awardees for awards granted with award program.</li> </ul>	<ul> <li>In orientation sessions, include commitment to diversity and zero tolerance for assaults on another's self-esteem.</li> <li>Add a DEI category to performance appraisals for annual goals for performance ranking tied to compensation.</li> </ul>	<ul> <li>Overall, nursing, nursing leadership, C-suite with yearly improvement: New hires, turnover (90 days, 6 months, 1 year), and RN satisfaction.</li> <li>Be transparent with data. Develop meaningful DEI dashboards for staff and community audiences. Webpage visibility of workforce demographics and activities should be no more than one click away.</li> </ul>

# Work Schedule Flexibility

**Operational definition:** A staff scheduling approach that encompasses flexibility in work options, policies and scheduling with nurses cross trained to various units, to support well-being during a shift that incorporates time for professional development and leadership engagement such as shared governance

## Recommended action for leaders of health systems and hospitals:

Build a flexible workforce and flexible work environment with flexible scheduling, flexible shifts of variable start times and duration, and flexible roles.

	Site float pool	Multihospital system float pool	Seasonal and surge PRN to full-time float pool	Interdisciplinary care team
Definition	Single entity, on-site float, i.e., hospital, clinic, floating to multiple units within a specialty or as cross trained	Multisite enterprise float pool where appropriate in a defined geographical region for daily or long-term placement	Expansion and contraction of clinical and nonclinical workforce as needed to accommodate predictable seasonal fluctuations (i.e., seasonal trends, geography, demographics of patient population served)  Retired workforce picking up assignments based on demand  Per diem/part-time workforce picking up full-time assignments to bump up FTE  0.6 FTE who work 0.3 during the summer and 0.9 FTE	<ul> <li>Interdisciplinary team for shift-based tasks, e.g., resource nurse, ancillary staff, admissions, discharge, medication pass nurse, break nurses, weekend coverage. etc.</li> <li>Staff in this category follow nontraditional hours and shifts to support peak volume and tasks and can be hired into float or nonfloat departments.</li> <li>Consideration is also given to use of support provided through virtual roles and resources.</li> </ul>
Targets	<ul> <li>Group of clinicians who float by specialty within their scope of practice and competency and licensure</li> <li>For the future, consider a float pool comprising nonclinical staff for surges. This was leveraged successfully during the COVID-19 pandemic.</li> </ul>	<ul> <li>Group of clinicians who float by specialty within their scope of practice and competency and licensure. Highly skilled staff cross trained and oriented to multiple units.</li> </ul>	Float: Group of clinicians who float by specialty within their scope of practice and competency and licensure. Highly skilled staff cross trained and oriented to multiple units.  Nonfloat: Group of clinicians assigned to a dedicated unit to practice within their scope of practice and competency and licensure.	Float: Group of clinicians who float by specialty within their scope of practice and competency and licensure. Highly skilled staff cross trained and oriented to multiple units.  Nonfloat: Group of clinicians assigned to a dedicated unit to practice within their scope of practice and competency and licensure. Also includes ancillary staff.

 $continues \rightarrow$ 

## Work Schedule Flexibility (continued)

	Site float pool	Multihospital system float pool	Seasonal and surge PRN to full-time float pool	Interdisciplinary care team
Scope of impact	<ul><li>Patient care quality and safety</li><li>Staff satisfaction</li><li>Cost</li><li>Management</li></ul>	<ul><li>Patient care quality and safety</li><li>Staff satisfaction</li><li>Cost</li><li>Management</li></ul>	<ul><li>Patient care quality and safety</li><li>Staff satisfaction</li><li>Cost</li><li>Management</li></ul>	<ul><li>Patient care quality and safety</li><li>Staff satisfaction</li><li>Cost</li><li>Management</li></ul>
Accountable entities	<ul><li>Nursing</li><li>Finance</li><li>HR</li><li>Hospital leadership</li></ul>	<ul> <li>State boards of nursing to support compact licensure and multistate practice, scope of practice</li> <li>Nursing</li> <li>Finance</li> <li>HR</li> <li>Hospital leadership</li> </ul>	<ul> <li>State boards of nursing to support compact licensure and multistate practice, scope of practice</li> <li>Nursing</li> <li>Finance</li> <li>HR</li> <li>Hospital leadership</li> </ul>	<ul> <li>State boards of nursing to support compact licensure and multistate practice, scope of practice</li> <li>Nursing</li> <li>Finance</li> <li>HR</li> <li>Hospital leadership</li> </ul>
Timeline	Three to six months for change management, hiring, training and deployment	Six to 12 months for change management, hiring, training and deployment	Three to six months for change management, hiring, training and deployment	Six to 12 months for change management, hiring, training and deployment
Measurable outcomes	<ul> <li>Frontline employee engagement</li> <li>Patient experience</li> <li>Reduction in agency overtime</li> <li>Reduction in vacancy and turnow</li> </ul>			

 $continues \rightarrow$ 

## Work Schedule Flexibility (continued)

	Site float pool	Multihospital system float pool	Seasonal and surge PRN to full-time float pool	Interdisciplinary care team
Action steps/ Steps toward implementation	<ul> <li>Do a cost analysis to build the program. (Review unit-level spending to scope specialty to include premium and agency spend.)</li> <li>Understand workflow trends and data to build flexible schedules that will allow for continuity of patient care.</li> <li>Build a job description.</li> <li>Review pay structure/total compensation and benefits.</li> <li>Set up organizational structure for management.</li> <li>Develop education structure (orientation, competency).</li> <li>Upskill and cross train the workforce.</li> <li>Provide education and change management for the organization about the new team. Include organizational definition of flexible workforce and definition of internal contingency and float pool rules.</li> <li>Define ways to deploy for operational use.</li> <li>Include an assessment of outcomes to address concerns about impact on patient care/potential fragmentation.</li> </ul>	<ul> <li>Do a cost analysis to build the program. (Review unit-level spending to scope specialty to include premium and agency spend.)</li> <li>Understand workflow trends and data to build flexible schedules that will allow for continuity of patient care.</li> <li>Build a job description.</li> <li>Review pay structure/total compensation and benefits.</li> <li>Set up organizational structure for management.</li> <li>Develop education structure (orientation, competency).</li> <li>Upskill and cross train the workforce.</li> <li>Provide education and change management for the organization about the new team. Include organizational definition of flexible workforce and definition of internal contingency and float pool rules.</li> <li>Define ways to deploy for operational use.</li> </ul>	<ul> <li>Do a cost analysis to build the program. (Review unit-level spending to scope specialty to include premium and agency spend.)</li> <li>Understand workflow trends and data to build flexible schedules that will allow for continuity of patient care.</li> <li>Do a seasonal trend and volume analysis to build the team.</li> <li>Build a job description</li> <li>Review pay structure/total compensation and benefits.</li> <li>Set up organizational structure for management.</li> <li>Develop education structure (orientation, competency).</li> <li>Upskill and cross train the workforce.</li> <li>Provide education and change management for the organization about the new team. Include organizational definition of flexible workforce and definition of internal contingency and float pool rules.</li> <li>Define ways to deploy for operational use.</li> <li>Offer flexibility in scheduling for nonfloat, i.e., hiring regular staff who agree to work more hours during seasonal/ predictable surge periods.</li> </ul>	<ul> <li>Do a quantitative and qualitative data analysis of shift-based needs to build unique roles such as break nurses, resource, preceptor pool, etc.</li> <li>Do a cost analysis to build the program. (Review unit-level spending to scope specialty to include premium and agency spend.)</li> <li>Understand workflow trends and data to build flexible schedules that will allow for continuity of patient care.</li> <li>Do a seasonal trend and volume analysis to build the team.</li> <li>Build a job description.</li> <li>Review pay structure/total compensation and benefits.</li> <li>Set up organizational structure for management.</li> <li>Develop education structure (orientation, competency).</li> <li>Upskill and cross train the workforce.</li> <li>Provide education and change management for the organization about the new team. Include organizational definition of flexible workforce and definition of internal contingency and float pool rules.</li> <li>Define ways to deploy for operational use.</li> <li>Offer flexibility in scheduling for nonfloat.</li> </ul>

# Stress Injury Continuum

**Operational definition:** Stress injury continuum is inclusive of burnout syndrome, compassion fatigue, moral distress, anxiety, depression, post-traumatic stress disorder (PTSD) and other phenomena and refers to the range of negative consequences from stress exposure.

## Recommended action for leaders of health systems and hospitals:

Address burnout, moral distress and compassion fatigue as barriers to nurse retention.

	Routine assessment of stress injury	Resources to provide (including peer support and mental health services)	Dedicated team to collect and analyze data	Data to inform the development of further resources
Definition	Routine use of a standardized tool to measure stress injury	Resources to support the breadth of impacts stress injury can have (which vary among individuals).	Organizational leader or team or outside group (such as Employee Assistance Program, or EAP) is accountable for assessing aggregate data from the assessment tool.	A team that includes leaders and frontline staff uses data to inform further resource development.
Targets	The whole of the nursing workforce		<ul><li>EAP personnel</li><li>Chief wellness officer, or</li><li>Wellness team</li></ul>	
Scope of impact	<ul> <li>Frontline nurses and frontline leaders</li> <li>Impact includes bringing attention to individual and group well-being and raising awareness of resources</li> </ul>		<ul> <li>Leaders</li> <li>Wellness team</li> <li>EAP personnel</li> <li>Note that demonstrating the imparent and the imparent</li></ul>	•
Accountable entities	<ul> <li>Frontline staff (doing uptake)</li> <li>Leadership (providing time and emphasizing importance of use)</li> </ul>		Depending on organizational stru  • Wellness team  • Wellness officer  • HR personnel, or  • EAP personnel	cture:
Timeline	3 months	3 months	3-6 months	12 months

continues  $\rightarrow$ 

## **Stress Injury Continuum** (continued)

	Routine assessment of stress injury	Resources to provide (including peer support and mental health services)	Dedicated team to collect and analyze data	Data to inform the development of further resources		
Measurable outcomes	<ul> <li>Metrics that demonstrate the impact of recommendation implementation</li> <li>Changes in absenteeism among nurses and nurse leaders.</li> <li>Changes in nurse retention and nurse turnover (that is attributable to stress injury).</li> <li>Response to changes in data on stress injury severity: Is action taken when the numbers rise?</li> <li>Metrics that evaluate the process of implementing the recommendation</li> <li>Correlate the rate of screening to the use of services to assess whether they align.</li> <li>Track the use of screening tool (similar to hand hygiene tools).</li> <li>Extrapolate from existing measures that institutions use to measure, e.g., engagement and satisfaction surveys, to assess whether recommendation impacts these.</li> </ul>					
Action steps/ Steps toward implementation	<ul> <li>Identify (or develop or adapt) screening tool.</li></ul>	<ul> <li>Catalog existing resources and identify gaps.</li> <li>Include clinical services, such as ethics, palliative care and pastoral care, that may offer support for well-being or may be expanded to do so.</li> <li>Provide a continuum of support that includes peer support and access to mental health care.</li> <li>Identify common sources of distress and target root causes.</li> <li>Don't put the burden on the individual; it's everyone contributing to the culture that supports well-being.</li> </ul>	<ul> <li>Codify use of the screening tool as part of practice so that aggregate data can be collected.</li> <li>Identify priority clinical areas or groups at high risk and consider further data collection.</li> </ul>	<ul> <li>Include key stakeholders         to participate in resource         development based on data         analysis.</li> <li>Arrange for frontline staff using         paid time to attend meetings         and contribute to this work.</li> </ul>

A call to action: Exploring moral resilience toward a culture of ethical practice.  National Academy of Medicine. (2022). Resource compendium for health care worker well-being.  Ofei, A.M.A., Paarima, Y., Barnes, T., & Kwashie, A.A. (2020). Stress and coping strategies among nurse managers.  Journal of Nursing Education and Practice, 10(2), 39-48.					

#### **Stress Injury Continuum** (continued)

**Recommended action for leaders of health systems and hospitals:** Organizations should incorporate the well-being of nurses as an institutional value. This recommendation aligns with the work of the National Academy of Medicine Action Collaborative on Clinician Well-Being and Resilience.

	Recognition of the continuum of stress injury	Actions that promote well-being are imperative	Individuals and organizations share responsibility for team member well-being
Definition	Stress injury can have a variety of impacts including burnout syndrome, compassion fatigue, moral distress and mental health disorders, including depression, anxiety and PTSD.	The normal state is to need time and help processing experiences in the health care workforce.	Institutions have an obligation to provide support and individuals have a corollary responsibility to accept it.
Targets	<ul><li>Direct care staff</li><li>Hospital leaders</li></ul>	<ul><li>Direct care staff</li><li>Hospital leaders</li></ul>	<ul><li>Direct care staff</li><li>Hospital leaders</li></ul>
Scope of impact	All employees (greater impact on those without awareness of stress injury)	All employees	<ul> <li>Increase in trust between organization and its employees</li> </ul>
Accountable entities	<ul><li>Professional organizations</li><li>Health care leaders</li></ul>	<ul><li> Professional organizations</li><li> Health care leaders</li></ul>	<ul><li>Health care leaders</li><li>Direct care staff</li></ul>
Timeline	3 months	3-6 months	6-12 months
Measurable outcomes	Include risk of stress injury in orientation, evaluation, huddles/meetings and other standard procedures and interactions.	Track use of resources with aim of increasing use.	<ul> <li>Binary adoption of well-being as a value (yes/no)</li> <li>Collection of data on number of hospitals taking this approach by professional organizations /National Academy of Medicine</li> </ul>

 $continues \rightarrow$ 

## **Stress Injury Continuum** (continued)

	Recognition of the continuum of stress injury	Actions that promote well-being are imperative	Individuals and organizations share responsibility for team member well-being
Action steps/ Steps toward implementation	<ul> <li>Build conversations about well-being into employee evaluations, staff meetings, unit/shift huddles and other communications: "What are you doing to stay well and how can I support that?"</li> <li>Raise awareness of resources and risk for suicidality among nurses.</li> </ul>	<ul> <li>Provide time off for mental health, commensurate with established policies for physical health.</li> <li>Create safe spaces for mental health conversations within the clinical space/ work time.</li> <li>Standardize breaks during a shift; end a culture that values working without a break.</li> <li>Identify strategies that include travel nurses' well-being.</li> <li>Consider a system that rates hospitals for the well-being of their employees (the way hospitals are rated for safety and patient experience) as this might motivate greater attention to the work environment.</li> </ul>	<ul> <li>Professional organizations invest in creating and/or disseminating "wellness as a value" toolkits.</li> <li>Offer modified duty/alternate work site to accommodate changes in mental health status/stress status.</li> <li>Support flexible staffing options to mitigate/prevent stress injury, e.g., a different schedule or an opportunity to engage differently (serving as an educator, a leader, cross training to another clinical space).</li> </ul>

# Innovative Care Delivery Models

**Operational definition:** Care delivery models that combine high-tech and high-touch for high quality care with an inclusive and integrated approach for patient and nurse satisfaction, reduction of practice pain points and improved outcomes

#### **Challenges to Health Care System and Delivery**

Improving access to behavioral health and improving effectiveness of interventions for individuals with behavioral and mental health conditions, including care integration, nurses in accountable care organizations and emerging delivery systems, and providing suicide, gun violence protection and substance abuse treatment.

Improving access to primary care and improving effectiveness of primary care delivery systems. Overcoming access barriers involving scope of practice, payment, shortages and distribution of primary care providers, and improving the effectiveness of nonspecialized health care, especially wellness/primary prevention activities and delivery systems.

**Improving maternal health.** Care related to sexual and reproductive health, especially prenatal care of women through the first year after pregnancy and addressing pregnancy-related deaths. This challenge especially concerns care in the context of the social determinants of health and racial/ethnic health disparities.

Improving care of the nation's aging population, including frail older adults whose numbers are growing rapidly. Of particular concern are those living in rural and other underserved areas.

**Helping to control health care expenditures, costs and increasing the value of nurses** require greater involvement by nurses. Opportunities exist to increase nurses' value, particularly as payment shifts to value-based payment models.

#### **Inputs Affecting Health Care System and Delivery**

**Informatics/Health IT.** The design, development, adoption and application of IT-based innovations in health care services delivery, management, and planning, including telehealth.

**Workforce.** The people working within the health care sector who deliver or assist in the delivery of health services, particularly RNs and APRNs. This concerns the supplies of various provider types, maldistribution issues, diversity and training adequacy.

**Delivery system.** The structures and processes that comprise health care delivery in the U.S. This includes the involvement of all health care organizations, professional groups, and private and public purchasers.

**Payment.** The structure and processes of reimbursement from public and private payers to health care delivery systems or providers and how dynamics of this system affects incentives for health care quality and access.

**Social determinants of health.** Conditions in the places where people live, learn, work and play affect a wide range of health risks and outcomes, including stable housing, education, income level, neighborhood safety, absence of social isolation and health equity.

#### **Key Questions**

- 1. What are the current challenges facing health care delivery related to each challenge in terms of each health care input?
- 2. How can the challenges facing health care be addressed by improving aspects of each health care input?
- 3. What evidence is needed to help stakeholders facing each challenge, focusing on research in the area of each health care input?
- 4. How might RNs and APRNs provide valuable contributions to improve each challenge?

Source: Cohen, C. C., Barnes, H., Buerhaus, P. I., Martsolf, G. R., Clarke, S. P., Donelan, K., & Tubbs-Cooley, H. L. (2021). Top priorities for the next decade of nursing health services research. Nursing Outlook, 69(3), 265-275.

**Recommended action for leaders of health systems and hospitals:** A tribrid care delivery model offers a more holistic approach that has three components, including onsite care delivery, IT integration of patient monitoring equipment, and ambulatory access and virtual/remote care delivery. This approach will improve access, patient and staff experience, and resource management, with continuous measurement for improvement and adjustment for sustainability and support.

	Assess and analyze the practice landscape and identify the gaps and opportunities	Identify resources and critical success factors	Craft the plan with support for nurses to lead and execute tribrid care models	Test and implement
Definition	Organizational needs assessment	Resource allocation and a shared definition of success	Inclusion of nurses in all sections of planning and identification of nurse champions for implementation	PDSA – Plan, Do, Study, Act
Targets	Nursing leadership collaborating with other key health care professionals and nurses who provide direct patient care to lead and own execution

# Total Compensation

Operational definition: All forms of payment received by an employee from an employer in the form of salary, wages and benefits

**Recommended action:** Develop an organization-wide formalized and customizable total compensation program for nurses that is stratified based on market intelligence, generational needs and an innovative and transparent pay philosophy that is inclusive of benefits such as paid time off for self-care and wellness and wealth planning for all generations.

	Comprehensive/flexible compensation philosophy	Narrative that appropriate nurse staffing is fundamental for optimizing available revenue	Compensation-added value  "intangibles" for nurses
Definition	A shift in approach to compensation that addresses a variety of needs and interests	How investing in appropriate staffing has a return to the organization and is not simply an expense/cost	New approaches specific to direct care nurses
Targets	<ul> <li>Health care workforce</li> <li>Nurses and APRNs, both hourly and exempt, at all levels of commitment status</li> </ul>	<ul><li>Nurses</li><li>Nursing leadership</li><li>Revenue cycle</li><li>Finance</li><li>Administration</li></ul>	<ul><li>Nurses</li><li>Nursing leadership</li></ul>
Scope of impact	<ul><li>Health care workforce</li><li>Nurses</li><li>APRNs</li></ul>	<ul><li>Nurses</li><li>Nurse managers</li><li>Nursing educators</li></ul>	• Nurses
Accountable entities	<ul><li> Human resources (HR)</li><li> Health system leaders</li><li> Nursing leadership</li><li> Chief financial officers</li></ul>	<ul><li>Professional nursing organizations</li><li>Nursing researchers</li><li>HR and nursing leadership</li><li>Chief financial officers</li></ul>	<ul><li>HR</li><li>Health system leaders</li><li>Nursing leadership</li><li>Chief financial officers</li></ul>
Timeline	12 months	6-9 months	6 months
Measurable outcomes	Within 12 months, the organization's flexible approach to total compensation is available, provided to, and shared with all nurses and other employees.	Within 9 months, the financial value of appropriate staffing is articulated. Data results from compensation survey are shared.
