Top Barriers

- Concerns about data privacy/security 31.9%
- Insufficient staff training/knowledge 19.5%
- Lack of funding for AI implementation

AI & Health Equity Governance Framework

2026 Opportunity & Impact in Nursing Summit

"Even as AI promises to deliver more personalized and predictive healthcare, the perils — both known and unknown — require attention to ethics, safety, and equity," said S. Craig Watkins, PhD, ACE Your Health AI Taskforce Chair.

"The ACE Your Health initiative is poised to leverage the wide range of voices — clinical, community, and industry — necessary to build an AI governance framework that is actionable, impactful, and inspired from the ground up."
