

# Dialogue Forum #1 Recommendations

1. Develop a national policy that addresses standardization of virtual nursing practice as a modality and considers funding and reimbursement models, as well as implications associated with licensure, regulation, and liability.
2. Advocate for technology that meets nurse and patient needs.
3. Support data collection on virtual nursing to understand the impact on nurse and patient satisfaction, as well as patient outcomes.

# Dialogue Forum #1 – Virtual Nursing

4. ANA recognizes virtual nursing as a source of support for nurses at the point of care. Virtual nurses should support, but not supplant nursing staff in nursing ratios, matrices, or other measures of staffing levels.

# Dialogue Forum #2 Recommendations

1. Advocate for meaningful legislation to address gun safety and firearm access, and increase funding allocated towards mental health services, gun violence and prevention research, including research on gun violence against health care workers and in health care settings.
2. Endorse the American Academy of Nursing's Statement on [Firearm Safety and Violence Prevention](#) and update ANA's position statement, [Incivility, Bullying, and Workplace Violence](#), to include gun violence and prevention in health care settings.
3. Promote nursing knowledge on the relationship between gun violence and public health, the risk factors of and protective factors against violence, evidence-based strategies to prevent violence, and the role of nurses in promoting gun safety and preventing violence, especially among children, adolescents, and young adults.

# Dialogue Forum #3 Recommendations

1. Generate a national consensus for research and policy development to lessen the burden of nursing documentation, particularly during a crisis or emergency using an all-hazards approach.
2. Partner with regulatory agencies and stakeholders to review current documentation standards and revise policies that reflect a national standard for crisis documentation, specifically for nursing.

# Dialogue Forum #3

3. Involve experts on nursing professional liability and state regulation to ensure that revised standards of documentation do not expose nurses to additional legal or regulatory risk.
