

Contents – *Correctional Nursing: Scope and Standards of Practice* 2nd Edition (2013)

A new professional resource developed by an ANA-convened workgroup of nurse experts, from all across their practice specialty, who comprehensively updated and expanded the 2007 edition. The result of their insightful work: an entirely new work that presents the essentials of contemporary correctional nursing in its full context. This is *the* one-volume delineation of competent nursing practice and professional performance common to and expected from correctional registered nurses, whatever their practice level or setting. Of particular note: the detailed discussions of the specialty's historical/legal aspects and its many practice settings, and a succinct framework for ethical nursing practice in the correctional setting.

Scope of Correctional Nursing Practice

- The History of Nurses within the Correctional Environment
- Health Care in Correctional Settings: A Brief Historical/Legal Perspective
 - Prevalence of Correctional Nurses
 - Population Served by Correctional Nurses
